

Sugarberry CCS Hub in the Community

As work continues on the Sugarberry CCS Hub, we wanted to share a few recent updates from our team and our ongoing efforts to be a positive impact in Hopkins County and the surrounding region.

Supporting Local Schools and Community Programs

Over the past several months, Sugarberry has been proud to support local schools and community organizations through donations and sponsorships. Investing in local students, educators and community programs such as the Sattilo Lady Lions Basketball team, the FFA auction and the Hopkins County Junior Livestock Show, is an important part of how we approach development, and we appreciate the opportunity to give back to the communities where we work.

Upcoming Hopkins County Health Care Foundation Handbag Bingo

We're also looking forward to participating in the upcoming Hopkins County Health Care Foundation Handbag Bingo event. This annual fundraiser has become a well-supported community tradition, and we're pleased to be among the organizations helping support its success. If you're planning to attend, we hope to see you there.

Meet a Member of the Broader Tenaska Team

As our engagement efforts continue, we'd also like to introduce you to Mike, one of Tenaska's Local Representatives in Louisiana, who was recently recognized by the Texas Department of Transportation as the 2026 Safety Professional of the Year for his leadership with the Permian Road Safety Coalition.

We are incredibly proud of Mike's accomplishment and the collaborative approach he brings to community engagement and public safety initiatives. As we look ahead to future public outreach activities for Sugarberry, we're excited about the opportunity for stakeholders to meet him and learn from his experience building partnerships across Texas communities.

Thank you for your continued interest in the Sugarberry CCS Hub. We appreciate the conversations, questions and feedback we receive from stakeholders and remain committed to providing open, transparent communication as the project advances.

Please don't hesitate to reach out if you have questions or would like to connect with our team.
